

**The below information details an exciting development to our service provision.**

At Drove we are committed to providing the best standard of care for you and your pet and have always been passionate that this care should extend 24/7 365 days a year. As such we have formed a partnership with the Vets Now specialist emergency group so that overnight your pets will be cared for in OUR OWN hospital premises but by their team of highly trained, dedicated night staff.

We are excited that this development allows us to progress our exceptional standards of care and enhance the high standards we already have at Drove Veterinary Hospital. If your pet requires our out of hours service, nothing will change. The vet on call will have full access to the full hospital facilities to ensure your pet still receives the exceptional care we pride ourselves on. If your pet is hospitalised with us during the day similarly, nothing will change, care will be transferred to the night team just as it is now and you will be updated regularly on your pet's condition.

There will be no change to our opening hours and other services but the development will allow your normal and local vet to be available to you more during the day for appointments and care.

If you have any queries please email us at [mail@drovevets.co.uk](mailto:mail@drovevets.co.uk) or call the Main Hospital on 01793 522483.

Yours Faithfully

The Team at Drove Vets.
